

Decision of the FIBAA Accreditation Committee for Programmes

100th Meeting on 29/30 September 2016

Project Number: 15/041
Higher Education Institution: KAZGUU University
Astana (Kazakhstan)
Study Programme: Bachelor in Law Enforcement Activity (LL.B.)

The FIBAA Accreditation Committee for Programmes has taken the following decisions:

According to § 7 (2) in conjunction with § 10 (1) of the “Special Conditions for awarding the FIBAA Quality Seal for Programmes”, the study programme is accredited.

Period of Accreditation: from 30th September, 2016 to 30th September, 2021

The FIBAA Quality Seal is awarded.

Assessment Report

The highlighted yellow parts of the text are those which deviate to the text in the report of the Bachelor of Laws (LL.B.)

Higher Education Institution (HEI):

KAZGUU University
Astana (Kazakhstan)

Bachelor study programme:

Bachelor in Law Enforcement Activity (LL.B.)

Qualification awarded on completion:

Bachelor (LL.B.)

General Information on the study programme

Brief description of the study programme:

The aim of the programme is to provide the graduates with the skills to meet the needs of the government in highly qualified specialists in the field of law enforcement ensuring its compliance with international human rights standards.

Type of study programme:

Bachelor programme

Projected study time and number of ECTS points assigned to the study programme:

4 years, 240 credit points

Mode of study:

full-time

Didactic approach:

Study programme with obligatory class attendance

Double/Joint Degree programme:

no

Scope (planned number of parallel classes) and enrolment capacity:

4, 20 students per class

Programme cycle starts in:

winter semester

Initial start of the programme:

2010

Type of accreditation:

accreditation

Procedure

A contract for the accreditation of the programme of **Bachelor in Law Enforcement Activity (LL.B.)** was made between FIBAA and KAZGUU University July 06th, 2015. On December 21st, 2015, the HEI submitted a self-evaluation report, which included a detailed description of the programme and further documents in order to prove that the criteria for programme accreditation were met.

At the same time, FIBAA appointed a review panel. The HEI agreed with the chosen experts. The panel consisted of:

Prof. Dr. jur. Dr. h.c. Thomas Schomerus

Leuphana University Lüneburg
Professor for Public Law
(Public Law, Energy Law, Environmental Law)

Prof. i.R. Dr. jur. Wolfgang Voegeli

University of Hamburg
Professor for Civil and Commercial Law
(Family Law, Family Policy, General Civil Law, Competition Law, European and International Commercial Law)

Mansiya Kainazarova

KIMEP University
Director of Institutional Research Department
(Institutional Research KIMEP University)

LL.M. Julia Titze

Municipal Utilities Herne AG
Corporate Development
(Commercial Lawyer)

Jan-Gero Alexander Hannemann

Göttingen University
Student of Law

FIBAA project manager:

Karin Legerlotz

The assessment is based on the self-evaluation report, amended by further documents, requested by the panel, and a site visit. The site visit took place on March 15th/16th/17th, 2015 at the HEI's premises in Astana, Kazakhstan. **The same cluster included an appraisal of the programmes Bachelor of Laws (LL.B.), Master of Laws (LL.M.), Doctor of Philosophy in Law (PhD), Bachelor in International Law (LL.B.), Master in International Law (LL.M.) and Doctor of Philosophy in International Law (PhD).** The programmes of this cluster were appraised with a second cluster including the programmes Bachelor of Economics, Bachelor, of Finance, Master of Finance, Bachelor of Management, Bachelor of Accounting and Audit, Bachelor of Tourism and Bachelor of Psychology. On end of the on-site visit the panel gave a short feedback on its first impressions to representatives of the HEI.

The assessment report based on this was delivered to the HEI for comment on August 31st, 2016. The statement on the report was given up on September 16th, 2016, it has been taken into account in the report on hand.

Summary

The **Bachelor in Law Enforcement Activity (LL.B.)** offered by KAZGUU University fulfils without exception the FIBAA quality requirements for bachelor programmes and can be accredited by the Foundation for International Business Administration Accreditation (FIBAA) for five years starting on 30th September, 2016 and finishing on 30th September, 2021 without conditions. The programme is in accordance with the national and the European Qualification Frameworks and the European Standards and Guidelines in their applicable version valid at the time of opening of the procedure, and with the Bologna declaration.

The quality requirement(s) that have not been fulfilled – internationality of the student body (chapter 3.4.2) – is not an asterisk criterion, so that a further condition is not necessary. The measures the HEI takes to solve the identified problem are to be considered during the re-accreditation.

The measures that the HEI takes in order to implement the recommendations of the panel members are to be considered during the re-accreditation.

There are many criteria in which the programme exceeds the quality requirements:

- **Positioning of the study programme in the education market (see chapter 1.3.1)**
- Positioning of the study programme on the job market for graduates (see chapter 1.3.2)
- Positioning of the study programme within the HEI's overall strategy (see chapter 1.3.3)
- Counselling for prospective students (see chapter 2.2)
- Transparency and documentation of admission procedure and decision (see chapter 2.6)
- **Ethical aspects (see chapter 3.1.5)**
- Equality of opportunity (see chapter 3.2.4),
- Guest lecturers (see chapter 3.3.3)
- **Skills for employment (see chapter 3.6)**
- Practical business experience of faculty (see chapter 4.1.4)
- Internal cooperation (see chapter 4.1.5)
- Student support by the faculty (see Chapter 4.1.6)
- Programme Director (see chapter 4.2.1)
- Process organisation and administrative support for students and faculty (see Chapter 4.2.2)
- Cooperation with business enterprises and other organisations (see chapter 4.3.2)
- Quantity, quality, media and IT equipment of teaching and group rooms (see Chapter 4.4.1)
- Career counselling and placement service (see Chapter 4.5.1)
- Alumni activities (see Chapter 4.5.2)
- Programme description (see Chapter 5.3.1)
- Information on activities during the academic year (see Chapter 5.3.2)

For the overall assessment of the programme, please refer to the quality profile at the end of this report.

Information

Information on the Institution

Kazakh State Law Institute by the Ministry of Justice of the Republic of Kazakhstan was established by the Decree of the President of the Republic of Kazakhstan N.A. Nazarbayev on March 14, 1994. The Institute set an objective to prepare highly qualified lawyers, capable in terms of socio-economic reforms to ensure legal reform in the country.

By the Decree of the Government Kazakh State Law Institute was renamed as Kazakh State Law University and transferred to the jurisdiction under the Ministry of Education and Science of the Republic of Kazakhstan on 5 November 1996. After the merging with the Institute of State and Law of National Academy of Sciences of the RoK the university was renamed as Kazakh State Academy of Law (KSAL) on February 14, 2000. On October 24, 2001 the university, established as a Republican State Enterprise, was transformed into a private company and renamed as "Kazakh Humanities and Law University" (KazHLU). In 2002 KazHLU moved from Almaty to Astana, the young capital of Kazakhstan. On 16 January, 2003 "KazHLU" PC was transformed into "KazHLU" PLC, on May 19, 2004 to "KazHLU" JSC and then renamed as "KAZGUU University" in 2015.

Under the decision of the IQAA Accreditation Council, KAZGUU had been accredited for 5 years (certificate of institutional accreditation issued under No.0013 dated 01.03.2013). In addition, on December 26, 2013 KAZGUU had been accredited as a subject of state-funded scientific and (or) scientific-technical activities (certificate No. 003645 issued by the Ministry of Education and Science of the Republic of Kazakhstan).

Located in the heart of Kazakhstan's capital, KAZGUU is one of the largest and fastest growing humanitarian universities of Kazakhstan with more than 5 000 students, 1000 academic and research staff.

KAZGUU University comprises three Schools that are Higher School of Law, Higher School of Economics as well as Higher School of General Education⁴. All students study during their first year at the Higher School General Studies and Language Training (Foundation), where the obligatory subjects named by the Ministry of Education are comprised together.

The Higher School of Law offers three degree programmes in law, international law and law enforcement activity.

The Higher School of Economics offers seven programmes in economics, management, finance, accounting and audit, tourism, psychology, and translation studies.

The Department of Postgraduate Education offers five Master's Degree Programmes in Law, in International Law, in Translation Studies, in Economics and in Finance.

The mission of the University is to contribute to the development of the society through the pursuit of education, learning, and research at the highest international levels of excellence. The aim of the University is to equip students with the necessary knowledge for leading positions in the sphere of law, economics and humanities in the Republic of Kazakhstan and abroad.

Programme Description and Appraisal in Detail

1. Objectives

1.1 Objectives of the study programmes (Asterisk-Criterion)

Initially the educational programme on Law was aiming at the realisation of the objectives set by the state to KAZGUU at the year of its formation in 1994. The main goal was then to educate highly-qualified lawyers, who would be able to ensure legal reforms in the country during its social and economic transformation. This objective is reflected in its mission until today. Since a lot of areas of law were considerably changed or even newly introduced after Kazakhstan's independency the law programmes had to be frequently reformed and adjusted to the new realities. Reforms usually did not occur step by step but were quickly implemented and often result oriented. These developments caused a series of difficulties, which are until today unfortunately reflected in the educational programmes of legal studies such as a lack of educational books, commentaries, a uniform approach to methodology and case-solving in academia and at the courts and the difficulty to reflect areas of law at a university level which are not yet or fully regulated such as administrative law or which are under permanent reform or/and without a Court System but at the Highest Council giving non-binding opinions on questions on constitutional law. The programme should therefore be seen in this context taking all the above mentioned aspects into account and the fact that Kazakhstan's legal system is still in a transitional stage.

The aim of KAZGUU is to provide the graduates of the Bachelor in Law Enforcement Activity with the skills to meet the needs of the government in highly qualified specialists in the field of law enforcement ensuring its compliance with international human rights standards.

Thereby, the programme aims to develop graduates skills in the following professional areas:

- protection of human and civil rights, based on international standards of human rights protection and national legislation, by appropriate reaction to all cases of offenses;
- protection and promotion of business and other activities not contradictory to the legislation aiming to create conditions for development of small and medium businesses, as well as a congenial investment climate;
- prevention of offenses by identification criminogenic and corruption factors and their preventive elimination;
- implementation of law enforcement in terms of identification, suppression and disclosure of offenses based on the principle of legitimacy using modern technologies.
- subject-oriented and extracurricular objectives and skills of qualifications include:
- understanding of the essence of law as a controller of social relations, knowledge of law functions, structure and elements of the legal system.
- knowledge of the objective laws of origin of the State, forms and methods of implementing the modern state functions, functioning rules of its institutions and agencies.
- knowledge of national and international instruments for human rights protection and promotion.
- knowledge of organisation principles and activities of law enforcement bodies and understanding their implications for public safety and order.
- knowledge of the types of legal liability, their features, grounds of measures application of state coercion to persons who have committed offenses.
- knowledge of criminal procedures, administrative procedures, civil and disciplinary procedures.
- well-written legal documents, conducting well-qualified oral consultations (in Kazakh and Russian languages).

- the ability to apply the rules of substantive and procedural law to specific cases of life, qualify the facts and circumstances in accordance with the law.
- possession of crime detection, suppression, disclosure and investigation skills and other offenses, the ability to identify, give a legal assessment of corrupt actions.
- knowledge of methods of crime prevention, identification and elimination the causes and conditions that contribute to their commitment.
- awareness of the legal, moral, social and economic impacts of its activities and the need to take responsibility for it.
- knowledge of the social and psychological aspects of communication, the establishment of social and professional relationships.
- critical thinking and independent decisions toward practical and legal problems.
- mastery of the effective communication technique, clear and precise communication with others, including those who are not familiar with the law.
- respect for the law and rights, intolerance for corruptive actions.

Appraisal:

The objectives of the programme are set out consistently to educate students to be able to work as highly qualified specialists in the field of law enforcement. The panel assesses the aim of the programme as very comprehensible and considers the explanations of the objectives as clear and intelligible. The objectives are based on subject-specific and generic learning outcomes which are in line with the academic state of the art and the level of the qualification to be awarded on completion. The panel also comes to the conclusion that the areas: empowerment, employability and personality/personal development are taken into account by the objectives of the programme. Furthermore, the panel highly appreciates the fact that ensuring human rights standards and fighting corruption are fundamental issues in the programme.

In the view of the panel the Dublin Descriptors are adequately covered by the intended learning outcomes. Also, the requirements of academic abilities are fulfilled. Hence, the panel considers the learning outcomes of the programme to be at the appropriate level for Bachelor degrees. The University analyses the findings of alumni tracking studies. The findings of the studies are considered within the developing process of the programme.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
1.1* Objectives of the study programme (Asterisk Criterion)			X		

1.2 International orientation of the study programme design (Asterisk Criterion)

Owing to the influence of European educational area the programme was designed towards meeting the international educational standards and criteria. KAZGUU's aim is to ensure that international human rights standards are a major component of professional development, considering the important role of law enforcement officials in the protection of human rights. The use of this guideline provide a universal approach to understand the goals and objectives of the programme, despite the differences in legal system and state structure at the national level. All disciplines of a major are based on international standards in law enforcement (particularly International Covenant on Civil and Political Rights; United Nations Code of Conduct for Law Enforcement Officials; Universal Declaration of Human Rights; Basic Principles on the Use of Force and Firearmsetc.). In addition, by the decision of the Academic Council of the KAZGUU on the proposal of the Higher School of Law new course "Human

Rights in Law Enforcement" was introduced in the curriculum of study programme in 2014 which has been specially developed jointly with the Ministry of Internal Affairs of Kazakhstan, the Office of the OSCE programmes in Astana and International Bureau for Human Rights and Rule of Law in Kazakhstan. Furthermore, KAZGUU includes other disciplines of international legal orientation in the programme; the international cooperation with leading foreign universities and research centers; the cooperates with international intergovernmental and non-governmental organisations; promotes the academic mobility of students and mutual exchange of students between KAZGUU and foreign HEIs; promotes the academic mobility of the teaching staff of KAZGUU, including foreign practical training of higher-education teaching personnel and invites foreign experts as guest lectures on a regular basis.

Appraisal:

The programme objectives and strategy are geared to ensuring internationality in teaching and research as well as graduate employability. In the opinion of the panel the programme equips graduates with the skills they need to perform the tasks required in an international environment by means of targeted knowledge and skills development. The orientation reflects the internationally oriented content of the programme and the activities in cooperation with foreign HEIs.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
1.2* International orientation of the study programme design (Asterisk Criterion)			X		

1.3 Positioning of the study programmes

The complete cycle of higher and postgraduate education in the specialty "Law Enforcement Activity" (Bachelor, Master, PhD) is realised only in three HEI of the Ministry of Internal Affairs of the Republic of Kazakhstan (Almaty Academy, Karaganda Academy and Kostanay Academy). These universities combine the educational process with service in law enforcement agencies, as the applicants having passed the entrance exams in these institutions, at the same time they must comply with enrolment regulations joining the internal affairs bodies (physical training, medical examination, a special test to respond to the national security, including control of all close relatives), and only then they will be taken to the HEI as an active police officer, take an oath and be assigned a special title - the private police.

This circumstance greatly distinguishes the learning process at these universities and at KAZGUU. For students of KAZGUU it is only a study programme, and for students of the other three universities is, first of all, the service in the Ministry, which is aligned with the learning process. For example, students of the other three universities have no right to leave the campus without special permission, do not have the right to determine free time and must have civil service (to clean up the territory, to eat according to the schedule, to engage in combat training, to participate in the protection of the territory and protection of public order, to serve in the dining area and dishwasher shop, to be on duty at the hostel and educational buildings, to have internship in constructions). This approach (combination of service and study) prevents the development of the autonomy and independence of thinking, as primarily aimed at learning submission and execution of orders. However, the target group KAZGUU is addressing with its programme applicants wishing to become professionals capable of an independent analysis of the situation, critical thinking and decision-making based on international standards of law enforcement.

The programme is also attractive in terms of tuition fees. Payment is set at the beginning of training and cannot be changed during the study. Thus, a student is guaranteed fixity of the financial costs associated with education.

As part of the promotion and positioning of the university programmes in the market, the university permanently organises informative open days, visits to Schools for the purpose of vocational guidance, and monitoring of the public opinion.

An additional advantage is the ability to study at the military department while continuing the basic education process.

According to the statistics KAZGUU provided, the request for the graduates of the Bachelor in Law Enforcement Activity has increased and the overall percentage of employed graduates was 78.9%. The existence of the universities of the Ministry of Internal Affairs of the Republic of Kazakhstan does not provide all the needs of the internal affairs bodies, as the Ministry of Internal Affairs of the Republic of Kazakhstan has about 156,000 employees. In addition, law enforcement agencies such as prosecutor's office, judicial authorities, the service of economic investigations and anti-corruption service do not have its own educational institutions offering a Bachelor's degree in law enforcement. At the same time, graduates of the universities of the Ministry of Internal Affairs of the Republic of Kazakhstan cannot be directly employed in these bodies, as they are required to work for at least five years in the institutions of the internal affairs after graduation. The labour market also offers some working places in courts, advocacy and special government agencies (National Security Committee, the State Security Service).

The university maintains constantly contact with employers both in Astana and in Kazakhstan as a whole, organises presentations of the companies in the walls of the university, and among graduates and fourth year students, surveys of employers to form criteria and competences of future graduates, organises consultations with employers on the programme.

Alumni interviews have shown that graduates of the programme are actively involved in supporting mutual networking and programme branding on the job market.

The University's overall mission is to serve the community by providing both quality and affordable education. The programme is being developed in coherence with University Strategy 2013-2020, a cornerstone of institution development. KAZGUU is implementing a student-centred and research-led culture. The programme underlines KAZGUU's strategy providing international standards of education as well as establishing strong relations with international universities. The law programmes form the core discipline of the university and refer to its special status that it has in legal education in Kazakhstan. Hence a special focus and emphasis has always been put on the legal programmes at KAZGUU, leading to the development of the Curriculum following aspects of the European legal educational system and further trainings for academic and administrative staff, which reflects on the educational programme offered to students.

Appraisal:

The panel formed the view that KAZGUU established its own unique and competitive profile by providing a programme in law enforcement with a different and future-oriented approach.

This future-oriented approach also leads to an outstanding positioning of the study programme in the job market. The panel considers the sector of law enforcement as a very important part in the development of Kazakhstan and therefore sees a great need in professionals capable of an independent analysis of the situation, critical thinking and decision-making based on international standards of law enforcement.

The study programme's qualification goals constitute the core of KAZGUU's strategy and are sustainably implemented.

2. Admission

In accordance with the requirements of Ministry of Education and Science of the Republic of Kazakhstan, in order to be enrolled for the undergraduate programme the candidate must take the UNT (Unified National Test). The test includes five secondary school subjects: Mathematics, History of Kazakhstan, Russian Language, Kazakh Language and an optional subject (the option depends on the study programme which candidate is going to apply for).

Applicants for the programme Bachelor of Law Enforcement must choose the elective subject "The world history" and get a grade not less than seven points.

The grade of the UNT certificate should not be lower than 50.

The candidate must apply directly to the University Admission Office.

To register for the Bachelor Programme the applicant must provide:

- a completed application in the established standard form;
- a diploma of secondary school (original document);
- the application of the diploma of secondary school (original document);
- a UNT certificate (the score is not less than 50);
- 6 photos 3x4 cm;
- a medical certificate form 086 (with attached fluorography picture);
- a certificate of educational grants (if any);
- a copy of the identity card;
- a copy of the registration certificate or military service card (for male applicants).

Foreigners wishing to apply to an undergraduate academic programme at KAZGUU according to the requirements of the Ministry of Education and Science of the Republic of Kazakhstan (MES) must present their secondary school completion documents and have an interview with the Admission Committee of School of Law. The criteria of selection via interview are established as follows:

- Motivation;
- Critical thinking and openness;
- Readiness for academic study.

To ensure the English language proficiency KAZGUU states that the applicants are required to be tested for the identification the level of knowledge (Entry test), to see if they are able to follow the English class in the first semester starting at level B1. The Academic Policy contains the rule that students who want to enroll in the programme should get at least 7 points in UNT/CT exam and also pass English exam in the University, showing at least level A2 or IELTS certificate 3.0. Students with TOEFL scores 60-78 or IELTS score - 6, 0 do not have to take this test.

The admission procedure is explained in the Academic Policy, which is available at the university website and regularly updated. In addition, booklets and brochures containing this information are distributed among participants of the KAZGUU during Open House Days. The Open House Days usually take place three times within an academic year. The date, time and venue are announced on the website.

Moreover, the University offers Student Counselling Service for prospective students to help them to handle any difficulties they may be experiencing, to develop academic and personal potential. The Service offers free and confidential support and guidance to optimise their chances to obtain admission into the University.

There are several scholarships available for newly enrolled students:

- "KAZGUU Gold Grant" - for those who gained "Altyn Belgi" (A level secondary school student) - 100% tuition fee reduction

- “KAZGUU Honour” - for winners of international and republican academic competitions - from 15% to 50% tuition fee reduction depending on level of the competition and position won.

The decision to grant the scholarship is annually taken by the KAZGUU Management Board.

All admitted and rejected students receive an official letter from KAZGUU. The applicant has the opportunity to receive a consultation by phone or have an online consultant via the website. The admission decision is based on above-mentioned transparent criteria, and communicated to applicants on the website and by e-mail/phone.

Appraisal:

The admission requirements as presented within the Academic Policy are defined and comprehensible. Thereby national requirements are taken into consideration. All requirements are defined in this document.

Standardised language tests or a different formalised and documented language test with the requirement of a minimum score ensure that the students enrolled are able to actively participate in the classes held in a foreign language.

KAZGUU ensures a constant availability for prospective students and reacts quickly to incoming enquiries. The applicants receive detailed information about the admission process and the programme they are applying for as well as an individual counselling options according to their personal needs.

The admission procedure is described, documented, and accessible for interested parties. The admission decision is based on transparent criteria and is communicated to the students. The panel appreciate that the applicants have the possibility to receive a consultation after the decision.

3 Contents, structure and didactical concept of the programme

3.1 Contents

The programme starts during the first two semesters with courses offered by the Higher School of General Education. The Higher School of General Education comprises compulsory courses as a unit, which is set by the Ministry of Education and Science of the Republic of Kazakhstan. The students therefore study during the 1st and 2nd semester general subjects, which are supposed to help them to strengthen their language and personal skills as well as basic knowledge in political science, sociology and economics in order to have a good foundation for the following modules related to their specific field of study.

The programme comprises the compulsory fundamental courses in Civil Law, Public Law and with a special significance Criminal Law. The special courses on Law enforcement respectively Criminal Law represent more than half of the curriculum. Moreover eight elective courses are offered, of which the students have to choose four courses (“Law Enforcement agencies”, “Law: formation, application, interpretation”, “History of State and Law of foreign countries”, “Constitutional Law of foreign countries”, “History of State and Law in the Republic of Kazakhstan”, “Jury trial: history and current practice”, “Public Governance and Administration” and “The functions of the Modern State”). The area of focus of the general and special disciplines is oriented to equip students with fundamental knowledge in the most important areas of law and skills on case-solving. Furthermore, there are courses dealing with the competencies of legal professions (“Notary”, “Advocacy”, “Prosecutorial Supervision”, “Forensic Examination”).

A professional internship in the last year of training logically completes the professional competence formation process of a student. It contributes to the development of practical skills and professional competences. During practical training students gain empirical materials and expertise for graduate studies.

The curriculum overview is shown in the following illustration:

Curriculum Overview BA Law Enforcement Activity, 8 Semesters

- L: Lecture
- S: Seminar
- T: Tutorial

The content of courses is provided by using interactive teaching methods in the learning process, as well as by experienced teaching experts who worked in the international legal sphere. They are practice - and research-oriented and follow the policy of including courses on case-solving into the curriculum and of inviting external lecturers and guest speakers from practice.

In order to strengthen the practical side of the study programme the case-oriented tutorials are part of the study program, focusing on the practical work of judges, lawyers, prosecutors and notary officers drafting legal documents in the form and writing style of a legal opinion.

The invited external lecturers and guest speakers come from practical national and international fields of law and sectors with an extensive work experience in legal system. They bring latest examples and practices from law sector and implement them in designing case-studies, real life examples, simulations and modeling assignments for students.

Furthermore, part of the programme is a ten week internship. The internship provides students with an opportunity to grow professionally, identify personal strengths and weaknesses, apply learned theory to practical situations, and gain an appreciation of the role, duties, and responsibilities of the work that the student has chosen as a career. The internship is designed cooperatively with the university, field professionals, and the student to provide an experience that is mutually beneficial to both the Intern and the organisation. An Internship Placement Process Orientation is held to inform senior students of the internship requirements and the placement process procedures. Following this meeting, students are asked to list three to five potential organisations on the "Intent to Intern" form. After completing the form and related materials, the student schedules an individual meeting with the internship coordinator. At this meeting the student's internship eligibility is determined and possible internship organisations are selected which will meet the student's professional development objectives and an agreement between the receiving organisation and KAZGUU is signed. At the end of their internship the students have to write an internship report.

KAZGUU states that the students are encouraged to develop deep knowledge of different disciplines with variety areas of focus, methods and epistemologies, and to learn how to purposefully and reflectively integrate and synthesise different perspectives in order to advance understanding and solve problems. In the programme interdisciplinary thinking is emphasised especially through courses such as “Principles of Political Science”, “Principles of Sociology” and “Principles of Economics”, providing students with enhanced creative thinking and scientific outlook and preparing students for occupations requiring trans- and interdisciplinary knowledge.

Ethical issues are discussed in frame of the course “Ethics and Philosophy”, which deals with specific features of general principles and norms of morality. This course aims to impart moral values such as justice, respect for human dignity, intolerance of dishonesty and manifestations of inhumanity, internal culture and tact, rejection of personal likes and dislikes, tolerant attitude towards others. Specific features of the interpretation of common principles and norms of morality in the future career are taught in the course “Professional Legal Ethics”. The course aims to foster the interest of students in moral values as justice, respect for human dignity, intolerance to the lies and inhumane manifestations, internal culture and tact, the rejection of personal likes and dislikes, tolerant attitude to others. Specific methods of resolution and overcoming the difficulties and contradictions of moral properties, arising in the professional field are considered in the studying of the course “Theory and practice of sentencing”, “Criminal investigation training (situational workshop)” and others.

From the beginning of their studies, students familiarise themselves with the methodological competences, main requirements, assignment performance, exams to be taken, academic work expectations, research and bachelor and/or master thesis performance. The course “Academic Writing and Reading” is aiming to teach students methods of selecting research topics, problem statement, dealing with doctrinal sources, special aspects of scientific style and accuracy in literature. Methodological competences are thoroughly trained in the case-solving courses whereas scientific practice is part of the courses preparing students to write their thesis.

The performance of the students in each module is evaluated by an examination. Students are tested on whether or not they achieve the intended learning outcomes of the programme by evaluation methods such as paper based examination, exam papers graded quizzes, case-solving, reports and the bachelor thesis including it’s defence. The thesis is prepared by the student on the basis of the theme reasonably and independently chosen and substantiated by the student. Important criteria regarding research into the topic of the degree project are:

- Interdisciplinarity, the choice is made due to the interaction of different disciplines and legal trends;
- Topic correspondence to priority areas of science at KAZGUU approved by the KAZGUU Academy of basic and applied sciences;
- Potential practical significance of the results of future research.

By performing the thesis the students need to show their ability to do scientific work and to apply scientific methods within a given period of time.

Furthermore, for finishing the programme, the students need to have completed all modules and then pass a State Comprehensive Exam, the format of which is defined by the ministry. The types of evaluation, procedures and course performance or module performance are included in the respective syllabus along with the employed teaching methods and studies duration. A system of continuous assessment is used and has the advantage of students receiving continuous feedback on their progress. The continuous monitoring of student progress means that problems which some individual students may have are identified sooner and can be dealt with.

Appraisal:

The content of the programme is arranged in a logical sequence from general modules to more specific modules in the three areas of law and it properly takes into account the programme's objective. Therefore, the curriculum is conceptually coherent. Furthermore, the electives enable students to acquire beneficial skills in accordance with their own interests. However, the panel realised that there are a few redundancies in the programme regarding the courses "Theory of state in law" and "Law: formation, application, interpretation and implementation." In this regard the panel recommends to dispose one of these modules or to combine them in order to create space for other subjects. In addition the panel would like to suggest to incorporate a course on legal methodology as a core course. These are suggestions to optimise the curriculum in order to enhance the student's employability. Nevertheless, the panel formed the view that the curriculum adequately reflects the qualification objectives of the study programme. KAZGUU states: The course "Law: formation, application, interpretation and implementation" was removed from the curriculum. Legal methodology to the extent necessary for the bachelor level is a key element of the course "Theory of state and law". Learning outcomes for this course involve students' skills to use legal methodology in their professional practice. At the advanced level, required for conducting legal research, legal methodology is studied within the master's programme. On the initiative of KAZGUU University "Legal Analyse" as a State Compulsory course was embedded into the model curriculum for the Master of Laws.

The panel expressly welcomes the measures taken by KAZGUU to improve the curriculum. The degree and programme name correspond to the contents of the curriculum and the programme objectives.

Theory and practice are sufficiently combined throughout the curriculum. Theoretical questions are geared towards application fields to promote employability on the programme. The included internship is envisaged to link theory and practice as well. The panel appreciate the use of case studies and encourages KAZGUU to even put a stronger focus on case solving in the subject related courses.

It is especially through the State Compulsory Modules that the students are made familiar with a range of different disciplines which promotes the interdisciplinary thinking of the students.

Ethical aspects are not only included in various subjects in the study programme. The identification and reflection of ethical aspects are strongly promoted and considered key competences and an integral part of the study programme's qualification objectives.

Through the module "Academic Writing and Reading" the students acquire additional methodological competences and are enabled to do scientific work on the required Bachelor level. The level of performance in examinations and the thesis are aligned with the learning outcomes of the module in terms of form and content. Although, the panel encourages KAZGUU to introduce also oral examinations. At the on-site visit the panel had the opportunity to look at theses and examinations written by the students. Altogether the students have provided evidence that they are capable of doing academic work and that the learning outcomes are achieved in the programme.

		Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.

3.2 Structure

Projected study time	4 years, 8 semesters
Number of Credit Points (CP)	240
Workload per CP	25-30
Number of modules	58
Time required for processing the final thesis and awarded CP	384 hours 16

One semester consists of 30 CP. Accordingly, in one academic year there are 60 CP obtained.

The programme does have the following structure:

- 13 General education courses (required by the state),
- 9 Major core courses (required by the state),
- 28 Major core courses (required by the school),
- 4 Major elective courses and
- 1 internship allocated with 13 CP.

Regarding the application of the European Credit Transfer and Accumulation System (ECTS), KAZGUU states to have implemented modules and to have assigned credit point to each module depending on its workload.

All modules have been described in module syllabi enclosing information on hours of lecturers, seminars and self-study, allocated credits, pre requisites, post requisites, recommended literature, content, lecturers, form of exam and assessment criteria.

All modules have been described in module descriptions enclosing information on the year of study, the semester when the course is delivered seminars and self-study, allocated credits, pre requisites, post requisites, recommended literature, content, lecturers, methods of teaching and learning outcomes.

Primary study and exam regulations are defined at the university level, and published within the University Catalogue. In addition, the Higher School of Laws has developed its own regulations regarding admission. The Examination Regulations set comprehensive rules and procedures, such as examinations' forms, deadlines, Examiners and Board of Examiners, Evaluation Criteria, Appeal Procedure, for all examinations including the State Exit Exam. KAZGUU is involved in academic mobility programmes with partner universities. For mobility students the Learning Agreements are signed beforehand by both partner universities. The academic period spent at the partner university is recognized and regulated in accordance with the Lisbon Recognition Convention, but one should note that the national recognition regulations completely differ. As required by the MES, to transfer ECTS in Kazakh credits the following scale must be used:

- for Bachelor students: 1 ECTS is believed to be equal to 1.5-1.8 Kazakh
- for one year Master students: 1 ECTS is believed to be equal to 2-2.4 Kazakh credits
- for two year Master students: 1 ECTS is believed to be equal to 2.5-3 Kazakh credits
- for Doctoral students: 1 ECTS is believed to be equal to 3.5-4.2 Kazakh credits

KAZGUU University uses the Grading System required by the MES

Quality	Grade Description	Percentage	Grade Point Average (GPA)
A	Excellent	95-100	4,0
A-		90-94	3,67
B+	Good	85-89	3,33
B		80-84	3,0
B-		75-79	2,67
C+	Satisfactory	70-74	2,33
C		65-69	2,0
C-		60-64	1,67
D+		55-59	1,33
D		50-54	1,0
F	Fail	0-49	0

And hands out a Diploma Supplement which contains the following grading scale:

ECTS grading scale

Grade	Students*	Definition	At KAZGUU
A	10%	Outstanding performance with minor errors	A/A-
B	25%	Above the average standard but with some errors	B+
C	30%	Generally sound work with a number of notable errors	B/B-/C+
D	25%	Fair but with significant shortcomings	C/C-/D+
E	10%	Performance meets the minimum criteria	D
F	-	Some more work required before the credit can be awarded	F
FX	-	Considerable further work is required	F

* Percentage of successful students normally achieving the grade

In accordance with the MES requirements the eighth semester is required to be free of classes and only the internship along with thesis preparation is allowed to be allocated upon it. For that reason, the ECTS credits are not evenly distributed across the curriculum.

To distribute ECTS to the thesis, business orientation and internship, the students' workload based on the MES requirements was estimated. The exams are assigned normally at the end of each semester. The number of exams usually corresponds to the number of courses.

The feasibility of the study programme's workload is also ensured by appropriate support services, such as advisers' service, programme coordinator, HSL manager on internal affairs, who collect students' feedback, develop recommendations at the faculty level.

The data on the student body is gathered and analysed by the Registrar. According to the data, the gender equality is ensured.

With the aim to assist all HSL students and especially the students with special needs the HSL employs Student advisors and a Manager on Internal Affairs. The Platonus System permits students to apply distantly on various inquiries serving as a mean of communication among

students and administration. Administration collects and processes throughout the HSL AQC students' inquires, where each case is considered on an individual basis. Possible decisions can be academical (inquires related to study – usually, it is recommended to follow an individual study plan which is developed by the adviser, inquires related to examination—an individual exam schedule could be proposed by the adviser and designed by the Registrar) or financial (the KAZGUU Management Board can grant a scholarship or a permission to follow an individual payment schedule). The Chairman of the HSL AQC systematically reviews inquires processed and provides general policy recommendations to the policy-makers at the university and school levels.

Appraisal:

The programme structure supports the smooth implementation of the curriculum and helps students to reach the defined learning outcomes. The curriculum is modularised (one course per module) and workload indications are made (see above). An internship is designed and integrated in such a way that CP can be acquired. Furthermore, KAZGUU provided module descriptions. However, the learning outcomes are not described in all of the module descriptions. There were also programme syllabi provided. The module descriptions provide detailed descriptions of intended learning outcomes and the information defined in the ECTS Users' Guide.

There are legally binding study and exam regulations which contain all necessary rules and procedures and take into account, where applicable, national requirements. The study programme is designed so that students can study for a certain time at other HEIs or do internships without any extension of their overall study time. The recognition of degrees and periods of study at other HEIs is regulated in accordance with the Lisbon Recognition Convention; the recognition of periods of practical work is also clearly defined. In the university's diploma supplements is a relative grading included.

The HEI ensures gender equality and non-discrimination. Students with disabilities are provided with affirmative actions concerning time and formal standards/requirements throughout the programme and examinations. Students in special circumstances, such as single parents, foreign students, students with a migration background and/or from so-called non-academic backgrounds, are particularly assisted. The measures taken are periodically reviewed and adapted in accordance with the obtained results.

3.2.4 Equality of opportunity		X			

3.3 Didactical concept

As teaching methods the programme uses a wide range of different case studies (meaning case-solving in tutorials and as well increasingly in lectures and seminars), discussions guest

lectures, company visits, work-place oriented practical assignments, game projects and situational analyses.

The case method involves solving the cases and different types of situational problems (case studies with simulation description of real situations, with closed and open story; case illustrations, case problems, case evaluation). This method forms the students' skills in determining the applicable law, legal reasoning. Also, the method allows gaining a number of social skills.

The method of discussion involves posing the issue, followed by a discussion, including work in small groups. This method helps student master critical thinking skills in dealing with specific legal issues, legal reasoning and make independent legal decisions;

The method of presentation of an essay or of a research project forms the students' ability to engage in scientific activities. Priority is given to research work in order to create a new research product, not only when student analyses the theoretical and practical material, but when he or she is also able to offer and share their vision of the disputed issue.

Furthermore the individual work of students has a significant role in the process of education; the results of such work can be in different forms:

- Traditional (writing creative essays, participating in colloquia, reviewing additional literature and articles, making presentations);
- Specific (reviewing international judicial and quasi-judicial practices, processing and analyzing of legal statistical information, preparing memoranda of the parties, decisions of international courts and tribunals, draft contracts and other international documents).

The learning materials are the area of responsibility for the teaching faculty who delivers classes. The programme administration keeps syllabuses and related learning materials for reference. A hard copy of the learning materials is provided to students before each module begins, with additional materials distributed by the teaching faculty during lectures/contact hours. All learning materials are regularly updated and also available for student during their studies in the electronic format. The learning materials give the students different points of view including approaches, solutions to different academic aspects, vision from various angles. This enables a certain degree of versatility and avoids sticking to one theory or one opinion. Moreover, KAZGUU emphasises, that learning materials are not simply given to the students to read. A part of their studies is focusing on the materials provided and delivered by the teaching faculty and another part the students seeking out information on their own, because the students are required to update their knowledge from the other sources beyond the lecture, such as investigate on the Internet, find in the reading literature, use their own experience. Through interactive work with the materials, the students are enabled to develop their own theory-based problem solving strategy. The course materials are continuously further developed according to the didactical concepts, and systematically designed according to the didactical preferences of the students.

KAZGUU encourages the teaching faculty to invite guest lecturers to their class. Guest speakers represent judges, lawyers, local or international diplomatic community and provide broader learning horizon and perspectives including interdisciplinary aspects and create additional networking opportunities for students. Because of its good reputation and the good relations in Astana, Kazakhstan and to HEIs abroad, KAZGUU was able to invite prestigious guest lecturers.

Tutorials in each area of law ensure a practical and case-solving approach. Furthermore, KAZGUU established an Advise service. The advisor is appointed among the teachers of the respective field of study and is responsible to help the student in resolving any issues that have arisen with regard to the academic policy and the curriculum, i.e. the resolution of controversial issues related to the process of studying, final examination, as well as the possibility of re-education or replacing discipline. At the beginning of the academic year, all new students are informed about the availability of their advisors and briefed about problems and the time period they have to solve them with the help of advisers.

Appraisal:

The didactical concept of the study programme is described, plausible, and oriented towards the programme objectives. It allows for the application of different teaching and learning methods. The panel appreciates the case-oriented and interactive approach and the efforts of KAZGUU to enhance critical thinking skills of students.

During the on-site visit the panel members had the possibility to survey the accompanying course materials of several courses. They came to the conclusion that the quality of these materials varies but on balance were of a good quality and do meet international standards. They are digitally accessible, user-friendly and encourage students to engage in further independent studies. In course descriptions of each module there is up-to-date literature available in Kazakhstan. While some of them are published more than 5 years ago, they are still the most up-to-date in Kazakhstan, as there has not been published new literature related to the course so far. Within the efforts to keep up-to-date study literature, KAZGUU has subscribed for Jstore and IPRbooks data bases in 2016. By these means students of the particular program have an access to the most up-to-date international study literature of subjects.

Guest lecturers are regularly invited, their contribution forms an integral part of the study programme's didactical concept. They have a very good reputation and come from a variety of occupations, which enhances students' chances of employment thanks to the profound insights they gain.

Tutorials help students to analyse cases as well as solving in-class exercises. Furthermore, advisors support the students in the learning process and help them develop competences and skills.

3.3 Didactical concept					
3.3.1* Logic and plausibility of the didactical concept (Asterisk Criterion)			X		
3.3.2* Course materials (Asterisk Criterion)			X		
3.3.3 Guest lecturers		X			
3.3.4 Lecturing tutors			X		

3.4 Internationality

According to KAZGUU international contents are integrated in the curriculum through such modules as "Principles of Economics", "Principles of Political Science", "History of State and Law of foreign countries", "Constitutional Law of foreign countries", "Roman Law" and "International Public Law". Furthermore, throughout the majority of the courses explanations are given in an international context. The course "Principles of Sociology" is aimed at enhancing the student's tolerance and respect for the culture and traditions of other nations. Moreover the students are encouraged to use the internship to visit companies, institutions or HEIs of other countries to conduct an internship.

One of the intangible assets of KAZGUU is building the free society aimed at future leaders. Therefore, it welcomes students from other countries and provides the necessary assistance. To promote the programme in other countries it cooperates with HEIs from other countries. However, in the programme at hand there are only national students enrolled.

Most of the teachers in the study programme at hand are citizens of Kazakhstan, but many of them have gained international experience on an educational level in the EU, USA, Canada, Japan, Malaysia etc. and some in addition work experience. The University is planning to further increase the number of international faculty (visiting and exchange faculty). Information on vacancies and other teaching opportunities, application procedures and university's proposition can be found on the KAZGUU website. Also experts with international work experience are invited for guest lectures on a regularly basis.

The main language and the official languages of studies at KAZGUU are Russian and Kazakh. The English Language is promoted by two English courses and one course in "Legal English". The course is developed in a way to provide the most up-to-date English for the areas of international law necessary to handle issues in today's diplomatic world. Also, some of the teaching materials of other courses are set in the format of English language textbooks and cases studies, so that students do learn not only in Russian language but also have a component of English language.

Appraisal:

The international and intercultural aspects of the curriculum are in line with the international orientation of the programme. Though the panel recommends to further stress the international and in particular the intercultural aspects of the courses in the module descriptions, which are basically implemented.

Furthermore, there is a pure national composition of the student body. Therefore, the panel recommends that the marketing strategy should be expanded in order to attract more foreign students.

The CVs of the teaching staff as well as discussion with lecturers on-site have shown that most of the lecturers, participating in the programme have experience on an educational level abroad. The panel appreciates the efforts of KAZGUU to further promote the international composition of the faculty.

The proportion of foreign language courses and required foreign language materials corresponds with the qualification objectives of the study programme. Nevertheless, the panel recommends KAZGUU to increase the amount of lectures in English and thereby raise the percentage of international students.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
3.4 Internationality					
3.4.1* International contents and intercultural aspects (Asterisk Criterion)			X		
3.4.2 Internationality of the student body				X	
3.4.3 Internationality of faculty			X		
3.4.4 Foreign language contents			X		

3.5 Multidisciplinary competences and skills (Asterisk Criterion)

According to KAZGUU students are encouraged to develop communication and public speaking skills as well as cooperation and conflict handling skills. It refers thereby to the

courses "English", "Legal English" and "Advocacy", in which the students are confronted with general and judicial rhetoric, which is fixed by means of gaming simulation sessions court, during which students learn the skills of communication, conflict resolution, the ability to withdraw from the conflict situation. Participation in the simulation trials during the investigative and operational exercises allow students to try on a future professional roles.

Students receive leadership and conflict resolution skills within the framework of the interactive teaching methods application, particularly involving work in small groups (solving of situational problems and case studies, participation in the gaming litigation, discussions).

Appraisal:

The content and learning outcomes and the didactical and methodological measures show that multidisciplinary competences and skills are part of the curriculum. This refers especially to the communication and conflict handling skills which are taught theoretically but also practice-related. In view of the panel, the acquisition of further multidisciplinary competences, such as leadership skills and broad contextual knowledge, is ensured, but could be stronger focused as a subject of the courses and not solely supported by means of suitable didactical and methodological measures.

		Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
3.5*	Multidisciplinary competences and skills (Asterisk Criterion)			X		

3.6 Skills for employment / Employability (Asterisk Criterion)

The programme provides students with both generic skills and specialist qualifications in the sectors of Law Enforcement Activity. In order to improve employment opportunities, the programme includes methods for self-development and self-education, where students learn skills of self-presentation, an objective assessment of their own strengths and weaknesses. Elective subjects give the students the opportunity of specialization in their chosen field of activity. At the end of the programme the students have the ability to independently analyse a situation and to critical thinking and decision-making based on international standards of law enforcement, which include the protection of human rights and the awareness of corruption. KAZGUU organises a special kind of cooperation with employers in the learning process throughout the internship. The highest form of this interaction is a paid professional training of students in law enforcement.

Furthermore, KAZGUU's Higher School of Law, the Department of Criminal Justice and Criminalistics and the Department of Internal Affairs of Astana city created a circle of "Detective" with scientific and practical topics. The purpose of the circle is the expansion of the professional competence of practitioners, research and knowledge transfer actions of law enforcement body with the subsequent employment opportunities.

A key role in the employability of the students also play the guest lecturers, who share their work experience and are always up to date on current issues in the working area and can effectively direct students to the employers' needs.

In an international context of the programme students have chance to enhance their employability in international companies or industries due to the fact that some courses are taught in English and the students obtain knowledge and understanding, for instance, of international criminal law, human rights in law enforcement and in comparison to the local context.

Appraisal:

The content of the programme, the learning outcomes and the integration of theory and practice promote the students' employability. In addition, the programme enables the students to actively apply the acquired skills in new areas of work and to develop them further. The programme is systematically oriented towards meeting the anticipated requirements of the job market and makes use of the close contact to future employers and their involvement in the further development of the programme. That way KAZGUU can react to new demands at an early stage. In particular the panel would like to highlight the special focus on human rights, anticorruption and critical thinking, which gives the graduates a great advantage in the transitional stage of the legal system in Kazakhstan.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
3.6* Skills for employment / Employability (Asterisk Criterion)		X			

4 Academic environment and framework conditions

4.1 Faculty

The undergraduate programme "Law Enforcement Activity" is supported by 64 lecturers. The faculty members are encouraged to have and mostly show business experience, in addition to excellent academic credentials that contributes the integration of theory and practice. It is expected that visiting lecturers, of those persons who come from national and international companies and firms, as well as state and private organizations, have significant business expertise to equip students with the skills necessary for future success. Some students choose to specialize further in a particular field of international commercial arbitration, comparative taxation law or European Union internal markets.

During the faculty meetings visiting lecturers have an opportunity to discuss specific teaching methods and ideas as well as issues related to students' professional and career development. The students directly benefit from these activities as new ideas are applied in the classroom. Hence, the faculty is actively encouraged to be engaged in research activities that is often conducted using businesses as the source of data, which gives a chance to work with practitioners around the country. To note, teaching-related publications usually include articles about new introductions in corporate law, curriculum and their potential impact on student skills and employability, business management case and an experiential exercise on improvisation in the classroom.

The HSL verifies the qualifications of the faculty members by means of state given (Decree No. 230 of the Government of the Republic of Kazakhstan dated on 17th of February, 2012 "Regulations of Competitive Hiring and Selection of Faculty and Researchers in the Institutions of Higher Education") criteria. In addition to these, KAZGUU adopted the following requirements for academically (AQ) and professionally qualified (PQ) status:

To qualify for an AQ status and be eligible to teach in the undergraduate program a faculty member should possess a PhD degree from an internationally recognized university and at least one published article in one of the internationally recognised journals (emerald, Springer or Interdisciplinary journals), approved by the Research and Budget Committee.

Doctoral students are academically qualified if they are in the ABD (all but dissertation) stage To qualify for teaching at the master's level, faculty should have at least one additional contribution (to be approved by the HSE Performance Appraisal and Promotion Committee).

To qualify for the PQ status at the undergraduate level a faculty has to prove the following aspects:

- At least a Master degree from an internationally recognized university
- At least five years of industry experience
- Internationally recognized professional certifications
- Be a member of professional organizations (optional)
- Ability to teach in English
- Active consulting practice
- Working with relevant community organizations, such as Chamber of Commerce, etc.
- A prior teaching at the master's level courses with positive references
- Be a board member (optional)
- Paper presented at professional meetings

The faculty members teaching experience of the department ranges from 2 to 35 years of work. Most of the teachers have experience in teaching for more than 5 years. Some teachers have practical experience in various government agencies, commercial organizations, etc. The university pays great attention on didactic qualification of faculty and steadily and

systematically improves the skills of teaching staff through internships, seminars, courses and skills development workshops. 57 teachers improved their skills using internal and external resources during 2014 and 2015.

The faculty selection is done by the HSL Performance Appraisal and Promotion Committee (FPAPC), the appointment is made by the HSL Dean. The HR Department helps in announcing a vacancy and searching appropriate candidates.

Since the programme's coordinator is responsible for the internal collaboration, coordination and overall administration, he holds an enlarged session of the faculty at the end of each academic year to discuss the current programme development. The goals of these meetings are group evaluation of the programme developments as compared with the previous year (changes in number and geography of applicants, partnerships and cooperation, student academic and individual success); need for curricular changes results of students' evaluation of particular course units, the overall quality of the study programme and their factual workload; interaction problems between lecturers; making demands towards the administrative staff etc. After each question on the agenda is discussed, a group decision is made (by voting if needed) and responsibilities to implement changes are distributed. All decisions are recorded and have binding character

The programme management addresses the issues and supports to the students that arise with the learning process. He reacts to any students' complaints during the learning process It provides in-depth information for students about the programme organisation, schedule, module requirements and expectations, and other necessary details. The faculty support the students within office hours and via Platonus and Email in accordance with the schedule approved. Office hours' information is given in each syllabus. Additional consultancy might be provided by the faculty by appointment if needed.

Appraisal:

The structure and number of teaching staff correspond with the programme requirements and ensure that the students reach the intended qualification objectives. A list of all lecturers and of the university's full-time staff in general shows the availability of the required capacity to implement the programme. The faculty's composition, consisting of full-time and part-time lecturers, guarantees that both the academic standards and the requirements of professional practice are fully satisfied.

According to the CVs the academic ability of the teaching staff is in line with the requirements of the programme for teaching. Besides, a high number of lecturers have long-year experience in teaching. The staff's pedagogical/didactical qualifications are in line with their tasks and have been verified. Measures for the further qualification of the faculty members are implemented. The practical business experience of the faculty is above-average and influences the teaching in an impressive way.

Internal collaboration and coordination is ensured by the programme's coordinator and can be seen in the meetings of the teaching staff. The faculty members cooperate with each other for the purpose of tuning the modules towards the overall qualification objectives. As affirmed by students of the programme during the on-site visit, the counselling of students by teaching staff is intensive. Student support is an integral part of the services provided by the full-time and part-time faculty. The lecturers are available for the students outside specified office hours as well and e-mails are answered fairly quickly. Hence, the students are "fully content" with the support they receive by the faculty.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.

4.2 Programme management

The Programme Coordinator is responsible for the programme academic quality. He is assigned by the Chair of Department from the faculty members and also an AQC member with voting right. His tasks are the academic supervision of the programme, the curriculum design, the promotion and development of research in a relevant field and the development of partnerships with appropriate stakeholders. He is also responsible for the communications with the faculty members and students regarding all issues related to the programme.

The administrative staff responsible for supporting students and faculty consists of:

- Director of School of Law
- Deputy Director of School of Law
- Head of Chairs
- Assistant of Chairs/Students Advisors
- Chair of Department
- Programme Coordinator
- Four Committees
- Academic faculty members

All responsibilities and tasks are documented in separate regulations, until the end of 2016 the HSE Code of Practice will be presented which covers every process of decision making. All committees involve faculty members from each department and also elected students representing the student body.

Appraisal:

The panel came to the view that the programme's coordinator is the stimulus of the programme well supported by lecturers and administration staff. Based on the interviews with the programme's coordinator, the staff and the students the panel is highly impressed by the sincere way in which all participants successfully manage all the above mentioned tasks and include all relevant groups in developing the study programme systematically.

Furthermore, the administrative staff acts as a service provider for students and faculty during the entire study programme. Sufficient administrative staff is available and opportunities for

continuous professional development of the administration staff are assured. Decision-making processes and responsibilities of the programme management and the administration staff are defined, students are able to participate.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
4.2 Programme management					
4.2.1* Programme Director (Asterisk Criterion)		x			
4.2.2 Process organisation and administrative support for students and faculty		x			

4.3 Cooperation and partnerships

Within the frame of implementation of the program Bachelor in Law Enforcement Activity HSL cooperates continuously with foreign educational institutions, such as

- European University Viadrina in Frankfurt (Oder),
- FBI Academy, Quantico, Virginia,
- John Jay College of Criminal Justice,
- Lomonosov Moscow State University (MSU),
- Kutafin Moscow State Law University (MSLU),
- Peoples' Friendship University of Russia (PFUR),
- Tomsk State University (TSU),
- Ural State Law University (USLU) and
- Volgograd University of MIA

The cooperations cover academic mobility for students and faculty vice-versa, implementation of the unique programme on transfer towards to the German system of legal education focused on the integration of the academic programme into international educational area and online lectures via the conference system «CISCO». Online workshops and round table talks with the Russian Diplomatic Academy are regularly arranged.

The School of Law and the Department of Postgraduate Programmes continuously interacts with the employers and organizations that render guidance in the academic process. The Coordinating Council of Employers of KAZGUU was established on January 17, 2015, and it is represented by the public bodies, public organizations and legal firms. It is a collegial, advisory and consulting body that supports School of Law in terms of enhancing the quality of academic programmes being focused on practical application of the students' knowledge, skills and public competences received, conducting joint applied research, and other forms of efficient interaction between School of Law and employers. The Council operates in accordance with the Regulations that has been approved on its first meeting.

The cooperation of the Higher School of Law with commercial enterprises and organizations on the program is implemented on the basis of a bilateral termless agreement. These enterprises and organizations are the bases of research and work-experience internships:

- Court of Astana
- Court registry of Astana
- Specialized Interdistrict Court on criminal cases
- District court of Almaty district of Astana
- District court No. 2 of Saryarka district
- Department of Internal Affairs (DIA) of Astana
- DIA of "Esil" district
- DIA of "Saryarka" district
- DIA of "Almaty" district

- Prosecutor office of Astana
- Prosecutor office of Esil district
- Prosecutor office of Almaty district
- Prosecutor office of Saryarka district
- Department of public revenues of Astana
- Astana Bar Association
- Forensic Center of the Ministry of justice of the Republic of Kazakhstan
- Central (Republican) science and research laboratory of forensic investigation
- District science and research laboratory of forensic investigation of Astana
- Chief Military Prosecutor's Office;
- Main Transport Prosecutor's Office;
- Department of criminal and penitentiary system of Astana.

Internship in organizations and enterprises of the city gives practical, scientific-research experience to students, which is reflected in the results of theses and affects the formation of their professional competencies. Students, who have performed well during the internship period, are invited for employment by the heads of organizations and enterprises in the event of vacancies. The representatives of organizations and enterprises, with which the agreements have been concluded, take an active part in the social activities of the University, particularly in holding of Job fairs where students can submit their candidacy for employment provided by enterprises and organizations. This cooperation has a positive impact on the academic content of the program, which is initially focused on the employer and on the formation of the skilled professionals. This cooperation has a positive impact on the academic content of the program, which will initially be focused on the employer, on the formation of the skilled professional. A Table below provides a list of commercial enterprises and organizations that cooperates with School of Law and Department of Postgraduate Programmes.

Appraisal:

The scope and nature of cooperation with HEI abroad are plausibly presented and documented as well as aligned with the strategy of the study programme. Cooperation is actively pursued and has a clear impact on the conception and implementation of the study programme. In the view of the panel the conducted activities contribute to the development of the students' qualification and skills. The academic mobility is one way mobility so far, but the increasing number of courses offered in English as well as attractive location of the city encourage its future alignment.

The cooperation with business enterprises and other organisations is actively promoted by means of regular meetings of those who are involved in the study programme in responsible positions, in order to discuss the further development of the programme. Such cooperation has a formative impact on the contents of the programme and on the profile of the graduates. By means of provision of internships and jobs during the vacation, they significantly contribute to the development of qualifications and skills and to the quality of the final theses.

		Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.

4.3.1(*)	Cooperation with HEIs and other academic institutions or networks (Asterisk Criterion for cooperation programmes)			X		
4.3.2(*)	Cooperation with business enterprises and other organisations (Asterisk Criterion for educational and vocational programmes, franchise programmes)		X			

4.4 Facilities and equipment

KAZGUU offers 26 study rooms equipped with onsite projectors and 40 portable kits of projectors for interactive teaching and learning. 366 computers which all are connected by Intranet can be used by teaching and administrative staff of the Higher Schools. Two independent, symmetrical, unlimited, 32 Mbs/ and 16 Mbs channels provide the University with internet access and also WiFi for students and staff. Furthermore the university offers computer laboratories and multimedia rooms for the students. The whole IT infrastructure has been renewed in 2013. In this context a system of video-conferencing has been implemented which allows the HSE to conduct online lectures and to have meetings and discussions online. The online portal of the University includes a learning platform “Platonus” and a system of electronic documents management «Documentolog». Both serve the students to administrate their studies and to access all necessary documents online.

The KAZGUU (database) library includes of over 50,000 volumes of books, e-books, e-journals, articles, periodicals and 393377 items (including periodic publications). Necessary books are available in Russian and English language. During the semester the regular library service hours during semesters are six days a week from Monday to Friday 9:00 – 18:00. Qualified library staff provides assistance to students in searching necessary books, journals or access to international database. Access to relevant digital media is also available from the students’ home. The KAZGUU Library is member of the International Association of Users and Designers of Digital Libraries and New Information Technologies (EBNIT Association, Moscow, Russia) and uses a lot of databases based on contracts with the Ministry of Justice etc.

Appraisal:

The whole equipment of teaching rooms, library and the whole HEI is state-of-the-art. Especially the IT and technical equipment of the labs which allow the students to do their work with the specific components needed impressed the panel very much.

The opening hours of the library take students’ needs sufficiently into account. Access to the literature and journals as well as to digital media (e.g. electronic media, databases) is ensured. The literature expressly required for the study programme is available in the library and also kept up to date.

	Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
4.4 Facilities and equipment					
4.4.1* Quantity, quality, media and IT equipment of teaching and group rooms (Asterisk Criterion)		X			
4.4.2* Access to literature (Asterisk Criterion)			X		

4.4 Additional services

In January 2015 the KAZGUU University has established an Office of Professional Internship, Career and Employment (OPICE), which is a body of the Coordinating Council of Employers that is related to professional internships, traineeship of students and assistance in employment for University Alumni. Beyond that the University annually holds Job Fair with

national and international companies and organizations seeking for employees. Thus, the Career Counselling and Placement Service is available throughout the semesters for graduate and undergraduate KAZGUU students seeking a job. So that assistance is provided to employers seeking either full- or part-time employees. Annual graduate student survey and feedback of those who are already full- or part-time employed show that during the study programme they are progressing and getting promoted in their organizations.

The Alumni Association of School of Law KAZGUU was established in 2014 as a platform for meetings, experience exchange between students and alumni, and support for comprehensive development of KAZGUU.

The mission of the Alumni Association is to unite alumni that care about the KAZGUU's traditions. The primary goals of the association are reached by:

- keeping the university traditions;
- enhancing the competitiveness of the university;
- promotion of the brand «KAZGUU University»;
- stimulation of the interest to the university from the applicant's side;
- meetings of alumni with KAZGUU students;
- development of database of KAZGUU alumni;
- improvement of the Alumni Alley;
- organization of Annual Alumni meetings for networking;

Alumni serve as mentor to various student organizations in the University. The Alumni Association is engaged with current students to share the heritage and traditions of KAZGUU University and the significant role that they as alumni can play after graduation.

Appraisal:

Career counselling and placement services are offered to the students and graduates to promote their employability. The HEI provides sufficient resources.

In addition, career counselling and placement services are offered to the students and graduates on an individual basis. Such activities are planned on a long time basis, performed regularly, and are actively marketed. Sufficient staff is available for this purpose. Students have access to the HEI-wide corporate network. The HEI brings its graduates in contact with representatives from business enterprises at regular events.

Alumni activities are planned on a long-term basis, performed regularly, and are actively used for assessing and evolving the programme. Sufficient (staff) resources are available for this purpose.

		Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
4.5	Additional services					
4.5.1	Career counselling and placement service		X			
4.5.2	Alumni Activities		X			

4.6 Financing of the study programme (Asterisk Criterion)

The Financial Model is developed by the Finance Department for five years ahead and reveals positive cash flows. It is based on the assumption that the number of students will not

decrease, as the university is not planning to increase the tuition fee except for an adjustment increment by the official inflation rate.

There is also a significant portion of government scholarship in the university revenue. Commercial revenue is coming from supporting commercial units aimed to invest into academic programmes. KAZGUU is a non-state joint stock company financed by own resources. 35% of university shares are owned by the Government which do not still give any preferences regarding financing. There is a state order (state scholarship) in regard to prepare the defined amount of Master students. State order is implemented on general conditions without any privileges.

Appraisal:

The existing system guarantees that every student, once enrolled for the programme, has the possibility to finish his studies.

		Exceptional	Exceeds quality requirements	Meets quality requirements	Does not meet quality requirements	n.r.
4.6*	Financing of the study programme (Asterisk Criterion)			X		

5 Quality assurance and documentation

The Quality Assurance Manager who reports directly to the rector is responsible for the collaboration between the Registrar, Higher School of Economics, Higher School of Law and the School of General Education and the Rector. The programme contents, structures and results are reviewed, analyzed and recommended for changes and improvements by the schools authorized committees/councils and follow the QA procedures defined on the Higher School level.

The responsibilities of the QAM include

- Planning for the academic year QA activities
- Coordinating the implementation of the QA activities
- Collecting data and preparing a summary report on QA
- Communicating the summary report to the Higher Schools and School of General Education
- Forming and organizing the Quality Assurance Committee's work on the university level.

The QAC on the university level is responsible for implementing and monitoring the quality assurance systems that promote academic integrity and effectiveness of the strategy. Quality Assurance of the programmes is done at the Higher Schools levels by the authorized committees or councils. At the schools levels faculty members and students participate in the respective committees to plan and assess the quality assurance and development procedures. The surveys are conducted by the Registrar through the Platonus system. The review is conducted by the QAC. The QAM provides reliable data and analytical reports to the Rector and the Higher Schools Deans for the further use.

The deans of the Higher Schools are responsible for communicating the results of the surveys to the respective faculty members through the Academic Quality Committees/Council on the school level.

The role of the QAC Committee on the university level is

- To develop and implement quality assurance systems and procedures across the full range of the Higher School of Economics, the Higher School of Law and the School of General Education programmes
- To monitor the implementation of quality assurance procedures and processes university-wide.
- To undertake such reviews and audits that are necessary to safeguard the integrity and quality of the university's activities.
- To provide the information and analysis necessary to support decision-making at the university level and within the academic departments
- To advise the academic units on the quality implications of proposals, policies and strategic plans.

The Registrar Office conducts a teaching quality evaluation by students at the end of each semester, namely one week before the end of classes. The questionnaire called Faculty Teaching Evaluation Form (FTEF) covers questions regarding the workload, the quality of teaching staff, learning materials etc.. The survey results are processed by the Registrar and collected by the QAM. The QAM forwards the survey results to the HSE Dean who organizes a meeting and discusses the teaching evaluation results with the relevant members. The results of the committee discussion are communicated to the programmes' coordinators and the relevant faculty members. At the beginning of each semester the school dean conducts a meeting with students in the form of an open forum with a presentation which covers the teaching evaluation results and the measures taken to address the students concerns and recommendations. The results in an aggregated format are also published on the Platonus system.

The faculty members can complete a questionnaire, the results are collected by the QAM to include them into the summary report and to discuss the results by the Quality Assurance Committee with the administration of the university.

The survey for alumni is conducted on a continuous basis through the university website. The results are collected once a year by the HSE and addressed with the AQC/QAC. The survey aims to reveal the graduates' employment data. The academic quality issues with regard to the programme content and structure are also revealed through the Alumni Club meetings. The programmes' academic quality evaluation by employers is given through the HSE Business Advisory Council.

The programme documentation which is annually revised and approved is published in

- The HSE Catalogue (website, HSE offices)
- Programme Study Plans (Registrar, HSE departments)
- KAZGUU Academic Policy (KAZGUU Catalogue)
- Programme Descriptions (Platonus, HSE Catalogue)
- KAZGUU Examination Regulations (all HSE offices, Registrar, Platonus)
- Bachelor Thesis Guidance (all HSE offices, website)
- Internship Policy (website, all HSE offices)
- Code of Conduct (website)
- HSE Brochure (website, HSE administrative offices, Registrar)85
- Course Timetable (Platonus)
- Performance Evaluation Results (Dean's office, University HR)
- The PAPC, AQC, DC, R&B committees' minutes (Dean's office)

Current news and information about the study programme are usually published online. The HSE is notably active on social networks like facebook.

Appraisal:

A quality assurance and development procedure, which systematically and continuously monitors and develops the quality of the programme with respect to its contents, processes, and outcomes, has been set up. It takes into account the evaluation results and the analysis on student workload, success rate, and graduate employment. Faculty members and students participate in the respective committees to plan and assess the quality assurance and development procedures. Responsibilities are clearly defined.

Evaluation by the students is carried out on a regular basis and in accordance with a prescribed procedure; the outcomes are communicated to the students and provide input for the quality development process.

Quality control by the faculty is carried out on a regular basis and in accordance with a prescribed procedure; the outcomes are communicated and provide input for the quality development process.

An external evaluation is carried out on a regular basis and in accordance with a prescribed procedure; the outcomes are communicated and provide input for the quality development process.

The study programme is described in detail. This documentation is constantly updated and easily accessible for interested parties both in print and in digital form, which ensures a high level of transparency.

Press relations and network communication are actively maintained. In its annual report the HEI presents a summary of the activities of the academic year.
